

At the beginning of WW 2 Hitler resettled thousands of Germans throughout eastern Europe back into German-held territory. Records were made of these thousands of Germans, their names, birthdates, birthplaces, spouses, children's names, etc., and the area to which they were resettled. Hence GGD refers to them as the Resettlement films. Below is an alphabetized catalog listing of these persons.

Einwandererzentralstelle Films Catalog - found online <http://www.familysearch.org>

Galizien German Descendants has 55 thousand names, villages, birthdates, relatives, etc. of families that GGD has extracted from some of the below mentioned films. We wish we had been able to extract ALL the names, but we ran short of energy. To see the information we have extracted visit the "1939 Resettlement Records" section of <http://www.galiziengermansdescendants.org>. If you do NOT find the relative you seek there, you can order the appropriate alphabetized index from the microfilms listed below. Just visit your local Family History Library (see locations listed on the familysearch.org line URL listed above. The films are about \$4.00 in the USA for about a one-month rental, which rental can be time extended.

The Catalog consists of two parts. Part One catalog the 1,964 microfilm reels of E/G Kartei. These cards serve as an index to the actual *Stamblätter* documents. Each microfilm reel includes several hundred cards arranged alphabetically by individual names. The listing gives the name of the first person appearing on each film. By comparing the name that begins a film to the first name of the subsequent film, one can determine the range of names included on the film.

Part Two catalogs the 742 reels of actual *Stamblätter* documents. These are arranged by case number. The listing includes the range of case numbers included on each film. To find an individual, first search Part One for the film containing the range of names that includes the individual you are searching for. Then obtain that film and search it to find the film containing that case number. Obtain that film and search it in numerical order and you will find the individual's actual *Stamblatt*.
